LAMBLOCK

LAPPING BLOCK

Give your sealing parts a longer life.

MIRROR FINISH OF MECHANICAL SEALS

Industrial sites with important pipe networks require maintenance of Pumps and Seals at the lowest possible costs. LAMBLOCK is a simple, low cost and easy to use system that will allow you to achieve Optical Flat Surfaces with Mirror Finishes.

SAVING TIME AND MONEY

With LAMBLOCK any Maintenance Department can achieve cost effective maintenance of any type of Mechanical Seal, several times over thus preventing the need to purchase new replacement parts.

LAMBLOCK in its portable case can be used anywhere, any-time for on-site maintenance.

OTHER LAM PLAN MIRROR FINISHING EQUIPEMENT

The TRI BLOCS contains 3 MM Plates in one case, roughing, finishing and superfinishing complete with Diamond Stick Compound for each plate.

MM LAM PLAN PLATE

All LAM PLAN mirror finish devices are equipped with the patented Lapping Plate MM the only one with two components allowing the optimal efficiency of your superfinish operation.

LAPPING PLATE SERVICE REFURBISHMENT

After repeated use of your LAMBLOCK plate flatness may be lost. When this is apparent we will refurbish the plate within 24 Hours.
